Job Reference: Software Development Internship Summer 2025

Dear HR Department at Syntess Software,

My connection with Syntess Software began with two exciting moments: winning a 3D printer at the Hacking by the Sea Hackathon 2024 and a Meta Quest3 at the We are in IT Together Conference 2024. These things sparked my curiosity about why Syntess sponsored so many events, leading me to learn more about this company.

I found Syntess is a place of innovation and teamwork, as evidenced by your agile workflows and development of cloud-based ERP solutions. Your open, dynamic corporate culture that values results and well-being convinced me that Syntess is the ideal place for me to grow as a developer and make a meaningful contribution.

As a second-year ICT student at HZ University, I have acquired skills in JavaScript, SQL and web development. My latest project creates an eco-friendly trading platform using Sveltekit and microservices, focusing on enhanced user experience and efficient backend processing - skills that are directly applicable to the development of powerful ERP solutions such as Syntess Atrium. My experience with diverse projects and frameworks using Agile workflows allows me to quickly adapt to your technology stack and contribute to your team.

I've got a bachelor degree in Biological Science and worked in a laboratory. This experience has sharpened my analytical thinking and attention to detail. Working in a structured environment has taught me to prioritize accuracy and efficiency. I apply all these skills to problem solving in software development. I also hope that my unique perspective can bring new ideas to Syntess.

Thank you for considering my application. Syntess embodies the innovation, impact, and support I seek in an internship. I would like the opportunity to discuss with you how my background and passion can bring value to Syntess Software.

Sincerely,

Anan Li
