Fourth-year HBO-ICT · Available from 1 February 2027

Languages: English C1 (Proficient) · Dutch A2 (Elementary) · Mandarin Chinese (native)

I am a software developer seeking a graduation internship with project experience in C++ debugging, HTTP software development, and software testing. I have cross-domain experience spanning life sciences, healthcare education and industrial automation.

TECHNICAL SKILLS

Languages: Go, JavaScript, TypeScript, PHP, Python, C++
Web & Framework: Laravel, Node.js, SvelteKit, HTML5
Tools & architecture: Git, MySQL, SQLite, Docker configuration

INTERNSHIP EXPERIENCE

3D Anatomy Learning Application Sep 2025 - Jan 2026

JRCZ - Software Developer Intern | C++, Unreal Engine, Blueprints, Blender

- Diagnosed crashes using logs and code inspection; corrected C++ object and callback lifecycles, with no crashes reported in subsequent internal testing.
- Integrated digestive organs through a shared base class, dedicated manager and sidebar controls, allowing users to show or hide organs in the anatomy view.
- Packaged the application and wrote step-by-step instructions for testing by teachers and students.

PROJECTS

Dungeons & Dragons Character Sheet Application Sep - Oct 2026

Individual HZUAS coursework | Go, HTTP, JSON

- Built Go CLI and web interfaces with shared rules and JSON storage for character data.
- Added concurrent API enrichment with rate limits and timeouts, preserving earlier successful results.
- Tested domain rules, HTTP handlers and API failures; the suite passed with Go's race detector.

Cloud-Powered Minesweeper Apr - June 2025

HZUAS coursework | Python, Azure Functions, Blob Storage

- Built a Python Azure Function to generate Minesweeper boards and save JSON game states in Blob Storage.
- Added logging and documented Application Insights monitoring to check execution and investigate errors.

Second-hand Exchange Platform Oct 2024 - Jan 2025

HZUAS team project | Node.js, SvelteKit, JavaScript, SQLite

- Implemented JWT and bcrypt login with SQLite, replacing temporary user data with persistent accounts.
- Built community services and SvelteKit integration, allowing users to create, browse and join communities.
- Added Docker configuration and GitHub Actions build/test steps for the team's development workflow.

EDUCATION

HZ University of Applied Sciences Sep 2023 - Present
Information and Communication Technology - HBO *Middelburg, NL*

Norwegian University of Life Sciences Jan - May 2026
Data Science Minor - Exchange *Oslo, Norway*

University of Maryland, Baltimore County Sep 2014 - Jun 2018
Biological Sciences - Bachelor of Science *Baltimore, USA*

ADDITIONAL EXPERIENCE

English Teacher | Kaizhim Information Consulting Co., Ltd., Guangzhou, China 2020 - 2022

Laboratory Technician | DNA4 Technologies, Baltimore, USA 2017 - 2019
